RE: CG Docket No. 03-123; TRS Fund – Drastic VRS Rate Cuts

Dear Chairman Martin,
Commissioners Adelstein, Copps, McDowell, and Tate:

I am a hearing person and use Video Relay Service (VRS) to communicate with other deaf and hard-of-hearing individuals. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other hearing and Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

I, along with other hearing and deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

Cheryl L. Lango

Re: CG Docket # 03-123

**Dear Chairman Martin, Commissioners Adelstein, Copps,
McDowell, and Tate:**

I am a legally deaf. I need and use Video Relay Service (VRS) to communicate with either non-deaf or hearing individuals in my own native language -American Sign Language (ASL or Amslan). I am writing to strongly urge the FCC to establish a new stable, reliable, and predictable VRS rate for the next three years.

I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other deaf or hearing-impaired individuals, use these services in both our work and personal life. It is an important way in which I communicate with both hearing and deaf individuals.

I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service. I know that a long-term stable rate will directly impact the VRS services that I rely upon.

Please set a fair Video Relay Service (VRS) rate that encourages VRS providers to:

(1) Increase VRS access for all deaf individuals through outreach programs. The providers will serve more deaf people, not discourage them from reaching out to more deaf people.

(2) Invest in the training and development of additional professional interpreters. The providers will give interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities in the nearest future.

(3) Improve VRS technology to provide reliable 24/7 and 911 services. The providers will give their service and technology improvements, such as the development of new video-phone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services. Cutting the VRS rate would severely impact the quality of VRS, which I rely on for my communication needs.

Very truly yours,

A handwritten signature in black ink, reading "Gerald L. Sullivan". The signature is fluid and cursive, with a long horizontal stroke at the end.

Dear Chairman Martin, Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

RE: CG Docket No. 03-123

Jane Marshall

I'm a hearing person - I do use VRS alot to my brother, deaf, and we love ASL Interpreter as we can understand each other better - Hate to use TTY Relay Service (wasting time). Using VRS - very quick.
